

# ESSENTIAL PANDEMIC KIT for your school.

As we prepare for Schools to reopen, this is right time to start thinking about ways to help protect your students and staff from the risks of being exposed to COVID-19.

This is why Spaces Health has created a year-round infection prevention program. Our robust program includes multiple product solutions, ranging anywhere from PPE, to our innovative Hands-Free Sanitizer Dispensers. By implementing these quality products, we'll get you one step closer to creating a safe infection free zone to fight infection throughout your School.

**Our customized consultative approach to your COVID-19 preparation plans will consist of industry leading space planning. Our projections will be based on current staff counts, number of classrooms, number of entrances and the needs of additional private offices. We'll help ensure you feel safe and fully prepared.**
